

17. 3. 2016

I have come here very excited and full of hope. Despite some problems I had to face here at the beginning, I think it was quite a challenge for me. Basically, my ability to overcome these problems has shown me whether or not I had made a right decision to come here.

At the beginning, I was very nervous because I had no friends here in the Czech Republic but as time passed by I made a lot of friends (even from Mexico) and thanks to them I started to feel like at home here.

I love the town, the city of Prague, the whole country, everything is great. The only thing is that people here do not smile a lot but I think it is because of the cold climate.

I love the Czech language, however, it is the most difficult language I have studied until now. But as we are used to say: „The practice makes the master.“ I really enjoy the course because the teachers prepare us for many practical and useful situations outside the classroom in the real world.

All teachers are wonderful! They have not spoken to us in English much but as soon as we were able to communicate in Czech a little bit, it was not really a problem anymore. In four months we were able to communicate in Czech.

I love the country and the language classes which proved to me that when you have a dream you can fulfil it in case that it is what you really want to do.

I really appreciate everyone's help and support. I will never forget this amazing experience!
